

Program to take a string from the user and compute its length.

CODE:

```
#include<iostream>
#include<string.h>
using namespace std;
int main ()
{
    char str[50];
    int length;
    cout << "Enter an array or string : ";
    cin>>str;
    length = strlen(str);
    cout << "Length of the string is : " << length;
    return 0;
}
```

OUTPUT:

```
$?) { g++ String_length.cpp -o String_length } ; if ($?) { .\String_length }
Enter an array or string : MayurBohra
Length of the string is : 10
```
